PROFESSIONAL SUMMARY

Master of Applied Computer Science graduate with internship experience developing full-stack web applications and data-driven software solutions using React, Node.js, Python, SQL, and RESTful APIs. Experienced in designing relational databases, developing ETL pipelines, debugging application issues, and delivering interactive web applications and analytics dashboards through industry and academic projects.

EDUCATION

Master of Applied Computer Science

St. Francis Xavier University, Antigonish, NS, Canada

Sept 2024 – May 2026

Bachelor of Engineering in Computer Science

SRM Valliammai Engineering College, Anna University, Chennai, India

Aug 2020 – May 2024

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript, TypeScript, HTML5, CSS3
Web Development:	React.js, React Router, Vite, Tailwind CSS, Bootstrap, Node.js, Express.js, RESTful APIs
Databases:	SQL, MySQL, MongoDB
Data Analytics:	ETL, Pandas, NumPy, Power BI
Testing:	Manual Testing, API Testing (Postman), User Acceptance Testing (UAT), Jest, React Testing Library
Developer Tools:	Git, GitHub, Postman, VS Code, Jupyter Notebook, Vercel, Render
Computer Science:	Data Structures & Algorithms, Object-Oriented Programming, Database Design, Computer Networking, Agile Development

PROFESSIONAL EXPERIENCE

Website Coordinator

St. Francis Xavier University Students' Union

Aug 2025 – May 2026

Antigonish, NS, Canada

- Supported and maintained a production website serving 5,000+ students by resolving layout issues, improving page-load performance through caching and lazy loading, and ensuring cross-browser compatibility.
- Investigated and resolved functional and layout defects using Chrome DevTools, documenting root causes and communicating technical solutions to non-technical stakeholders.
- Standardized a content publishing workflow across university departments through reusable templates and clear technical documentation.

Front-End Developer Intern

FirstLanguage Technologies

Aug 2023 – Jul 2024

Chennai, India

- Integrated RESTful API endpoints into React applications to support NLP analytics dashboards and interactive user workflows.
- Developed reusable React components using Context API and custom hooks, improving maintainability and reducing unnecessary re-renders.
- Resolved state synchronization issues by refactoring shared application logic instead of applying temporary fixes.
- Collaborated with designers and backend engineers in Agile sprints, participating in code reviews and sprint planning.

React Developer Intern

Across the Globe

May 2023 – Nov 2023

Bangalore, India (Remote)

- Implemented responsive user interfaces using React, building reusable tables, forms, and dashboard modules from design wireframes.
- Collaborated with backend developers to integrate RESTful APIs and deliver features from design through deployment.

PROJECTS

DermaCure - Skin Analysis Platform

GitHub | Live Demo

- Designed and developed a full-stack healthcare application using React, Express.js, and MongoDB, implementing multiple role-based pages for patients, doctors, appointments, scan results, and administrative workflows.
- Implemented JWT authentication, role-based access control, middleware authorization, and MongoDB-backed user management.
- Wrote unit and integration tests using Jest and React Testing Library while supporting manual and user acceptance testing (UAT) to validate critical application workflows before deployment.
- Debugged CORS issues and asynchronous race conditions through systematic root cause analysis.

Spotify Music Intelligence Platform

[GitHub](#) | [Live Demo](#)

- Developed a Python ETL pipeline to extract Spotify Web API data, perform data cleaning, transformation, data quality validation, and load curated datasets into a normalized MySQL database.
- Designed normalized relational database schemas, reporting views, and analytical SQL queries using joins, CTEs, aggregations, and window functions.
- Optimized analytical query performance by creating indexes on frequently queried columns and validating execution plans using EXPLAIN before integrating reports into Power BI.
- Built interactive Power BI dashboards featuring album insights, track popularity, listening duration, explicit-content distribution, and artist performance analysis.

HabitIQ - Smart Habit Tracker

[GitHub](#) | [Live Demo](#)

- Built a full-stack MERN application using MongoDB, Express.js, React, and Node.js to manage habit and productivity data securely.
- Integrated the Google Gemini API to generate personalized habit insights and recommendations based on user activity.
- Built interactive productivity dashboards using aggregated habit data to visualize completion rates, consistency trends, and user progress.
- Debugged RESTful API integration issues and asynchronous data-fetching race conditions, validating fixes through manual testing and user acceptance testing (UAT) of key application workflows.

Job Market Reality Check Analytics Dashboard

[GitHub](#) | [Live Demo](#)

- Cleaned and structured job posting data using Python, Pandas, and NumPy, resolving missing values and standardizing formats.
- Wrote SQL queries to identify in-demand skills, salary patterns, industry trends, and high-volume hiring sectors.
- Developed interactive Power BI dashboards featuring KPI cards, salary insights, hiring trends, and skill-demand visualizations.

CERTIFICATIONS

- Meta Front-End Developer Professional Certificate — Coursera
- React.js Essential Training & REST APIs — LinkedIn Learning
- SQL Essential Training — LinkedIn Learning
- Python for Data Science & AI Development — IBM
- Power BI Dashboards for Beginners — LinkedIn Learning
